Ultra-high pressure Super Critical CO₂ (SCFE) extracted products

- ❖ **Astaxanthin 5% - 15%**
- ❖ **Lutein esters 10% - 40%**
- ❖ **Policosanol 90%**
- ❖ **Rosemary 10% oil soluble (Carnosic acid) 20% powder form**
- ❖ **Lycopene 6%, 10%**
- ❖ **Gingerols 5% - 40%**
- ❖ **Tulsi (Basil) - > 1.5% Ursolic acid**

Phytochemicals

- ❖ **Thiocolchicoside > 99%**
- ❖ **Colchicine USP**
- ❖ **10-DAB III 99%**

Other key extracts

- ❖ **Chlorogenic acids 45% - 60%**
- ❖ **Glabridin 40% - 95%**
- ❖ **Polymethoxylated Flavones (PMF)**

Ennature Biopharma (A division of India Glycols Limited, India) is in the business of manufacturing natural active pharmaceutical ingredients (API's), standardized botanical extracts and spice extracts for the beverage, dietary supplement, functional foods, pharmaceutical and cosmeceutical industries. We are using state of the art, toxic-free, high selectivity super critical fluid extraction technology (SCFE) to produce superior quality extracts.

Our Manufacturing unit is strategically located in Dehradun (foothills of the Himalayas, India), which provides an excellent agro climatic zone for cultivation of medicinal plants. The facility is spread over 100,000 sq. ft. and comprises of a super critical fluid extraction (SCFE) infrastructure integrated with solvent and aqueous extraction units. The multi process facility has an annual capacity of 2500 MT. This allows us to manufacture a wide range of customer specific products while maintaining high levels of efficiency and purity.

Our manufacturing facilities are Kosher Certified, cGMP compliant and have been awarded the drug license from the Indian FDA.
